Versioning	• Git • Bitbucket • SourceTree

PROJECTS

Agile Board
Front End implementation of a Scrum board built with React and Redux where tasks can prioritize and labeled based on user's requirements.

React, Redux, JavaScript

COVID-19 Tracker
Integrated disease.sh API to create a COVID-19 tracker to visualize global stats and vaccination efforts in different parts of the world.

React, Context, JavaScript, Leaflet JS, Disease.sh API

Portfolio Website
A website to demonstrate my skills and projects and a medium for people to view my projects and contact me to collaborate on projects.

Angular, TypeScript

Mind Keeper (Currently Working On)
A fun way to record your notes, deadlines, Wishlist, and ideas.

React, TypeScript, Firebase

EXPERIENCE

SOLUTION DEVELOPER | BPM-D, Mumbai
May 2017 – November 2019

- Implemented features such as Dashboards and information panes for BPM-D's SaaS B2B platform built on Angular and PHP.
- Built reusable UI components like form controls to improve efficiency and decrease code redundancy.
- Documented bugs and new requirements from product managers for new features in JIRA
- Created proof of concepts for new features to evaluate and test how the final version will work.
- Performed code reviews to achieve clean maintainable code and ensuring standard practices are implemented.
- Managed versioning of git branches with Branching Workflow.
- Migrated Windows batch files to shell scripts to move from a XAMPP to Docker.

Key Achievements

- Led the team in the development Assessment functionality meant for businesses which helped us create leads to 3 potential clients.
- Employ of the Month for developing a feature for prioritization of projects.
